

# Cleaning Procedures at the Clinic

*(updated 16/3/20)*

## Waiting Room Cleaning Procedures:

- Counter, entry door handles, urn and water filter taps and toilet door handles cleaned at regular intervals throughout the day.
- Waiting room sprayed with antiviral and antibacterial essential oils in alcohol at regular intervals throughout the day.
  - Counter and EFTPOS machine cleaned between each use.
  - Antibacterial hand and surface wipes available for client use.
- Staff regularly disinfect hands with thorough washing, antibacterial hand gel or antibacterial hand wipes

## Acupuncture Centre Cleaning Procedures:

### After each treatment:

- All tables & door handles cleaned with antiviral/antibacterial wipes
- Room is sprayed with antiviral/antibacterial essential oils in alcohol
  - Pillow is covered in a fresh protective sheet
- Clinical Assistants wear gloves when removing needles. Please note that Scott cannot wear gloves as he needs to feel point location on the skin, however he washes hands thoroughly before seeing each client or uses antibacterial hand gel.

## Consulting Room Cleaning Procedures:

- Chair arms and Asyra probes are cleaned between each client.
  - Scott uses antibacterial hand gel before feeling pulses.

If you're infectious, please rest and recover at home. We can still help: ask us about our Super Immune Resilience pack. Scott is also available for phone consultations and we can mail you your medicines.
